

TILT COMPENSATION

in standing, walking and vehicle modes

Easily and safely
survey hard to
reach areas like
TRAFFIC LANES
UTILITY
FLOWLINES
BUILDING
CORNERS

Capture higher
accuracy
measurements
on steeper
slopes **from a**
moving vehicle

More accurate volume
measurements **save time and**
money on material planning

Easy to learn for
beginners and **saves**
significant time for more
experienced surveyors.

Faster measurements,
more efficient
stake-outs and **no**
magnetic interference.
